

Portable Battery Pack

RVS-506N

This portable battery pack will provide 7W power wherever you need it! This works perfectly for mounting wireless cameras temporarily and simply removing them when done. It comes with magnets on the bottom so you can literally throw on and take off without drilling holes or installing brackets. Charging the battery is super easy and can be done by either plugging in a conventional electric outlet with a wall adapter or through a USB input. The RVS-506N takes about charges 6 hrs and lasts approximately 8-10 hours. Note: The battery pack must be attached to the power cable which is then attached to wireless camera power (Red to red, black to black).

SPECIFICATIONS

Battery Type	Lithium-ion batteries (Panasonic original import)	Charging Working Temperature	0° ~ +40°C
Capacity	10000mA	Discharge Working Temperature	-20°C to +60°C
DC Input	5V/12W 2A (max)	Storage Temperature	-40°C ~ +60°C
DC Output	12V 60mA (max)	Dimensions	1.14" (H) x 3.74" (L) x 2.83" (D)
Charging Method	Constant Current (CC) 2A (0.2C) to 4.2V cut-off charge Constant Voltage (CV) 4.2V 100mA to charge off / 10A (1C) Charging	Weight	280g
Charging Times	> 800 Cycles (Takes Approximately 6 Hours To Charge)	Charging/Discharging Indicator	Green light for 100% / Blue light for >75% / red light >25% / Amber Light for >25% but less than 75% / red light flash 60s then cut off power output if below 10%
Interface	DC 2.1 x 5.5 male	Mounting	Magnetic (No Drilling Required)
Shockproof Level	6G	Other	Auto shutoff when disconnected
Water Resistance	IP66
