

G-SERIES REAR VIEW REPLACEMENT MIRROR MONITOR WITH MANUAL DIMMING

RVS-718-MD

4.3" SUPER BRIGHT DISPLAY

This 4.3" display is super bright so that even when shining through the thick glass of the mirror it will display perfectly. It comes with adjustable grid lines so that regardless where you mount the backup camera, the grid lines will display correctly.

MANUAL-DIMMING

A good reflection is important in a rear view mirror, however at night when what's being reflected are bright headlights it does cause distraction to the driver. With manual dimming this mirror monitor reduces the glare from reflected headlights and keeps the driver without distraction.

SPECIFICATIONS
