

RVS-119

Microwave Blind Spot Sensor System

REAR VIEW
SAFETY
A Safe Fleet Brand

- **Perfect** for blind spots on Vans/Pickup Trucks
- **Aural and visual alerts**
- **Microwave Technology** accurately detects objects in blind spots
- **Mounts easily** without drilling holes
- **Fits vehicles** up to 23 FT

Finally, a blind spot sensor system without any drilling or complicated installation! Simply place the RVS-119 sensors behind the paneling on your cargo van or pickup truck and the system will give you visual and aural alerts when an object enters the blind spots to the side of the vehicle. While there will always be visual alerts, audio warnings will only trigger if the turn signals are on. This microwave blind spot sensor system improves overall safety and increases driver confidence. System comes with 2 different cable lengths for different vehicle sizes.

Option for visual alert to be in A-pillar or side mirror

BETTER CAMERAS. BETTER SERVICE.
