#CancelBlindSpots

The **Air Vue™** is the first of its kind: a reliable wireless camera solution engineered specifically for tractor trailers. Its **Pairing-Over-Power** technology enables accurate and buttonless camera-to-monitor pairing that ensures a reliable, accurate wireless connection from cab to trailer - even in crowded freight yards!

Connect up to 6 cameras - 3 wired and 3 wireless - to provide crystal clear views all around your largest vehicles to avoid collisions and sideswipes that cost your fleet time and money.

Connect our most Advanced Air Vue Monitor with our **AI Products** and Sensors for a truly cutting-edge safety solution that fits the needs of every fleet in any industry.

Automatic Instant Pairing

Pairing-Over-Power technology enables camera + monitor pairing via vehicle's electrical system.

Strong Signal & Reliable Connection

300ft stable transmission range covers even double & triple trailers and ensures accurate tractor-trailer pairing, even in crowded freight yards.

Built-In Recording

The Air Vue™ Advanced comes with reliable built-in recording that allows you to record 4 channels simultaneously.

Speedy Installation

Get your whole fleet ready to hit the road quickly with significantly reduced installation time versus a wired camera system.

Effortless Usage

No buttons to push- the operator doesn't have to do anything to activate the system!

Easily Integrated

Seemlessly integrate IP69K front, side cameras, and 4 Backup Sensors for an extra layer of protection.

Telematics Services

Easily connect to platforms such as, Samsara, Lytx, and Netradyne.

AI Ready

Air Vue™ wireless system supports Backup, Side and Dash AI Cameras, and the Cargo Ledge Alert AI System. Whether on the road or docking, add an extra layer of protection with intelligent visual and audio warnings.

Your All-encompassing Wireless Solution

The **Air Vue™ Advanced** gives tractor trailer drivers a multitude of viewing options, with its 4-channel split views and the option to send the video feeds to external recorders.
Each camera channel can be independently adjusted for horizontal-mirror or vertical-mirror view displays and supports a respective trigger line.
Easy installation, adjustable parking lines and built in recorder.
