

Video Solutions For Cannabis Transport

High Value Merchandise Needs High Value Protection.

Rear View Safety offers the ultimate in cannabis transport security and liability preservation for your merchandise, vehicle, and personnel. Whether it's interior/exterior HD cameras and sensors, GPS tracking, video recording, real-time incident alerts, or live remote streaming, we have the product for any application and will craft a custom solution for your business's unique pain points.

About Rear View Safety

Started in 2007 by a young entrepreneur, Rear View Safety has grown to become an industry leader in the manufacture, sale and distribution of vehicle safety solutions. In 2016, RVS joined the Safe Fleet family. With their broad portfolio of market-leading safety brands, 1,700 employees, and 14 manufacturing locations across North America, Safe Fleet continues to innovate and deliver the smart solutions that fleets will need to survive and thrive in a changing world – and ensure that operators, passengers, and pedestrians arrive home safely.

Who Is It For?

Customer Need:

Protection for a fleet of Mercedes Sprinter transport vans from backup incidents, a watchful eye on their cargo, road-facing and driver-facing cameras, with all views recorded.

RVS Solution:

AHD backup and interior cameras with dash mounted monitor for driver use, TRONG Dual Camera Mobile DVR mounted on windshield.

DISPENSARIES/DISTRIBUTORS

For customers outfitting their own trucks, we provide cameras, systems, tracking, and software options that can fit operations of all sizes.

UPFITTERS

We provide upfitters like AAA Work Trucks with systems that track, watch, and record driver activity, road activity, precious cargo, and any incidents that may occur.

G-SENSOR
Recognizes sudden movements i.e. hard acceleration, sudden stops, speeding and impacts. Can set alerts to to keep these recordings as events.

Mobilemule™ Software: Effective, Efficient, Easy To Use

Our state-of-the-art fleet management software is included free with your MobileMule™. Stream real time video from each vehicle simultaneously. Advanced and intuitive features make it ideal for a fleet of any size. Easily find, replay, or download the footage you need when it matters, all in one place.

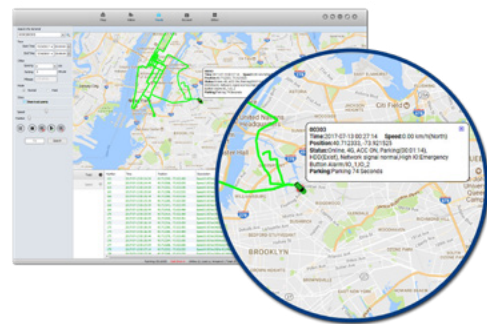

GOOGLE MAPS INTEGRATION

This feature allows you to instantly view the real-time physical location of every connected vehicle. Quickly view important color coded information, such as vehicle speed, network status/signal condition and hard drive health status.

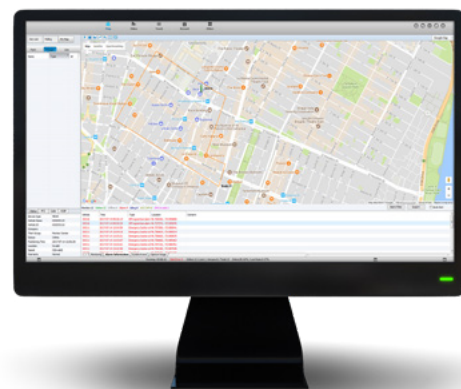

MULTI-VEHICLE LIVE VIEW

View every camera connected in real time or focus on the specifics you need at the moment. Several users can access up to 100 live video streams from multiple vehicles on the same page simultaneously.

BREADCRUMB TRACKING

View a breadcrumb trail of a vehicle's entire route based on a specified time frame. View vital information (vehicle status, hard drive status, exact address) from every breadcrumb still frame. Access important information for every second of every trip.

GEOFENCING

Set up a zone for each individual operator. You will be notified if a driver deviates from this route. This helps you keep an eye on your operators and they will drive better knowing they are being watched.

INSTANT REMOTE PLAYBACK & DOWNLOAD

Download or replay vital footage from your cameras remotely. Conveniently access important footage for court or insurance purposes.

INTUITIVE FILE MANAGEMENT

Organize important files with descriptions and tags. Conveniently recall files when needed. Intuitively sort files for reports.

SIMPLE SYSTEM MANAGEMENT

Specify which users have access to certain functions and information. This keeps private information private and protects your business.

COMPLETE REPORTS

Customize multiple reports based on specified time parameters. View reports with idle time, speed and more. It's easy to stay informed.

WIRELESS UPDATES

Update firmware through a wireless network.

MOBILE APP

Use Mobile App on your phone or tablet with the same features and functionality as the desktop app.
